ISA 2004 / Exchange 2003 / Office 365

Active Directory / DNS / FTP / IIS
Microsoft Office 2003 – 2016

Experience

Qualanex

Reverse Logistics

Libertyville, Illinois

2016 – 2017

Web Application Developer

- Altering tables, stored procedures, and triggers in SQL Server databases.
- Modifying web-form applications built with ASP.Net, CSS, HTML, JavaScript, SQL, & VB.Net.
- Fixing minor defects in a MVC application built with CSS, HTML, JavaScript, Razor & C#.

SNI Technologies

IT Consulting Services

Chicago, Illinois

2015 – 2016

Application Developer (W2 - Contract) at Logistics & Transportation Company

- Coded several functions, stored procedures, and views in SQL Server 2008 R2 that calculated Driver Pay, Fuel Surcharges, and Net Revenue for trip segments. Built several Net Revenue Reports in SSRS & Microsoft Reports.
- Designed and coded in ADO.Net, VB.Net, and VS 2015 Express a Win-forms application that displayed Driver Information and Net Revenue for movements in Data Grid Views.

TPH Global Solutions

Corrugated Packaging

Chicago, Illinois

2008 – 2015

Information Systems Manager

- VB.Net / SQL / Win-forms Development:
 - Greatly extended the company's business information system built in Win-forms which included sub-systems for billing and invoicing; pricing & quoting; order processing; customer, prospect, vendor maintenance; package & structural designs

- Built financial dashboards using Infragistic's grid & controls and Active Reports to allow senior management to view billings and bookings (sales, costs, profits) by industry, project type, customer, etc. on a monthly, quarterly, and annual basis. Built order status, image library, inventory, and problem tracking dashboards.
- Developed portals using WebGUI, VB.Net, Microsoft Reports, ASP.Net, and AJAX to allow vendors to enter prices and customers to view quotes and orders.
- Database Administration: Managed the company's databases using SQL Server 2000 Enterprise and express versions of SQL Server 2005, 2008 R2. Created & altered tables and stored procedures to delete, insert, select, and update records. Created views and cursors to compile & process data. Backup and restore databases; added logins to SQL Server and users to databases; imported & exported data. Created Hyper-V virtual server running Windows Server 2012 R2 & SQL Server 2012 and moved databases from older versions of SQL Server to SQL Server 2012.
- Network/Server Administration: Built and managed several physical and virtual servers using Windows Server 2003 / 2008 / 2012 R2 and Hypervisor. Managed the company's Database, DHCP, DNS, Exchange, FTP, and Web Servers. Managed the company's Active Directory and Firewalls. Migrated email from Exchange to Office 365 and configured Outlook. Other software that I worked with included AT&T's DNS Provisioning Tools, IIS & Word-Press, Microsoft Internet Security & Acceleration 2004, Microsoft Forefront Endpoint Protection, Symantec Backup Exec, Symantec Ghost, Symantec Endpoint Protection, and Trend Micro.
- Other Responsibilities: Purchased all IT related hardware & software and worked closely with the CEO (to whom I reported) regarding the IT expenditures and budget.

Corestaff Technology IT Consulting Services Warrenville, Illinois 2007 – 2008

Application Developer (W2 - Contract) at InfoTechnics (IT Services):

- **Financial Management Services (Bureau of U.S. Treasury):** Built in VB.Net (VS 2005) a Taxpayer Authentication System, which processed EDI flat files and inserted the data into a SQL Server 2005 database.
- **Oberweis (Dairy Products):** Updated the company's ASP.Net / VB.Net website and SQL Server 2005 database to enable marketing to add special promotion codes for new customers of their Home Delivery services; modified several reports built in Microsoft Reporting Services.

Hart, Schaffner, Marx Apparel Chicago, Illinois 2005 – 2007

Application Developer

- Management and oversight of the company's Retail Price Ticket Printing, Special Order Tracking System, and Warehouse Management Systems. Administration of SQL Server databases. Resolve locks; import/export data via DTS; backup and restore databases; write stored procedures, scripts, triggers; etc.
- Designed and implemented in SQL Server 2005, Visual Studio 2005, ADO.Net VB.Net, and a windows-based information system to enable myself and other people to manage the design and testing of garment price tickets for various manufacturing facilities, track inbound and outbound shipments in the company's warehouse management system, and track vendor information, invoices, packing slips, and products.
- Created a web-based application using ADO.Net, ASP.Net, & VB.Net to track changes to the company's Ticket Printing Systems. Designed and implemented a SQL Server 2005 database to support the information system.

World Distribution Services International Mail Elk Grove Village, Illinois 2003 – 2005

Application Developer

- Member of Senior Staff. Reported to the President and CEO of World Distribution Services. Worked closely with the CEO and other senior staff members to determine strategic goals and build applications in Access to enable the company to attain those goals and mid-tier managers to analyze, manage, & report on business information.
- Designed and implemented in Access, DAO, and VBA a Domestic Mailing System applications to enable
 - Acct Receivables to print summary & detail invoices; Finance to print detail & summary profit reports.
 - Client Services to setup clients and their prepay requirements.
 - Shipping and Receiving to enter packages received & print manifests.

American Dental Association Health Services Chicago, Illinois 2001 – 2003

Application Developer

- Designed and implemented in VB6, ADO, and SQL Server the following applications:
 - A Committee Bureau to manage committees and their members and resolutions.

- A Program Bureau to manage programs and their audiences and requirements.
- A Speaker Bureau to manage speakers and their programs, expenses, documents.
- Coded SQL scripts to alter or create tables, indexes, stored procedures, views.
