Sussex, WI | 262-312-0537 | hills8705@gmail.com

## Skills

I have a variety of skills that I am capable of putting to use, I have done work in automotive, weld/grind, building maintenance and repair and carpentry plus more. I have learned good time management skills. I also feel the need to take pride in my work and stand behind my job. I've learned to work in fast pace environments with total focus. I have an acquired knowledge of many different hand tools and power tools, with knowing how to repair them if broken. Always keep work area neat, clean, organized and safe. Very quick learner. Learned to develop good communications with coworkers and leaders.

## Professional Summary

**Gatherer Operator** 05/2017 to Current

**Quad/Graphics** Sussex, WI

As gatherer **Operator** I would have to keep the **machine** running, and load forms into each pocket correctly. A number of things could happen while running such as forms not entering correctly, jamming inside the gatherer wheel, raceway, parts breaking or wearing out and many more. I would also respond to company emails and doing monthly safety quiz's.

**Portable Flooring Department** 05/2015 to 06/2017

**Connor's Sports Flooring** Amasa, MI

The portable Flooring department built removeable basketball floors for such clients as the Olympics, final four floors every year and many other colleges, the entire department included myself among 6 other employees. I would use a jig to build the piece with inserted clips to lock into other pieces, after completing the build process I would then nail the correct size and grade flooring to each individual piece. It would then be ready to cut with computerized saw. Miscellaneous duties include loading each bay of shop with correct size and grade flooring with the **forklift**, loading trucks with completed floor using **forklift** and keeping shop 5-S compliant. Along with other smaller duties.

**Lumber Piler, Saw Operator, Edger Operator and Forklift Operator** 09/2013 to 04/2015

**Sagola Hardwood Ltd** Sagola, MI

I began employment at Sagola as a Lumber Piler and worked up to saw **operator**, Edger **Operator** and **Forklift Operator**. Most of my employment was spent in the Grade Mill where rough logs into all different grades and sizes. As **Forklift Operator** I would also help sort and pile

lumber when the bundle reached the right height I would quickly push the full cart out strap and tag the bundle then pick up with **forklift** and put in it's designated spot.

---

**Welder/Grinder, Maintenance**

06/2011 to 02/2013

**Northwoods Manufacturing**

Kingsford, Mi

As a Welder/Grinder it was job to lay the correct size appealing weld using mainly .045 or .052 fluxcore wire typically, welding in every position. I was later in charge of all the alluminum bronze welding and grinding, with beveled edge welds had to be perfect penetration because after weld/grind the peices would then get rolled to 45°. My duties in the maintenance department were along the lines of major roof replacement, window installation, concrete tear up and replace, painting, building new sections of plant, and occasional walk throughs.

**Tire Technician**

10/2007 to 10/2010

**Mr. Tire**

Iron Mountain, Mi

I would replace,fix, balance and occasionally rotate tires on customer vehicles. If tire was punctured I would take tire off Rim and use a patch on the inside of the tire. While customer vehicle was in garage I would go through the front end to make sure of no loose or worn out parts.

**Chip and Spool**

04/2007 to 07/2007

**Aroua Castings**

Aroua, Wi

Duties included clearing and metal, dust and debry out of metal castings with Grinder and air shot. Lifting and grinding parts with weight between 5lbs and 95lbs.

**EDUCATION:**

**High School Diploma**

**Kingsford High School, Kingsford, Mi**
