Light knowledge and experience within the HVAC field.

Light knowledge and experience within the Electrical field.

5 years food manufacturing experience.

Knowledge of GMPs and HACCP

Authorized to work in the US for any employer

Work Experience

Field Service Technician

Tru Check - Evansville, IN

February 2018 to June 2018

The Field Service Tech was tasked with driving to each assigned location and upgrade gas and electric meters for Vectren Energy. To change out electric meters I was required to wear proper PPE as well as follow crucial electrical safety procedures.

Reese Manual Panning Tech/Packaging Machine Operator

The Hershey Company - Robinson, IL

December 2012 to July 2017

I was tasked with forming the hard candy shell that covers the centers. I would pour various grades of syrups depending on where at in the process the candy was until it formed a smooth and uniform look. I also would have to take finished product out to the production lines or stack the ropaks in staging areas via forklift depending on which job I was doing that week. Cleaning would have to be done weekly and required the use of some very strong chemicals and the use of proper PPE, training on the chemical Quadexx System, and taught how to read MSDS forms.

While working in the Packaging department my job duties would vary depending on the line or product running. Basic duties were metal and quality checks. All packaging operators were tasked with repairing and fixing their own machinery should it break down or need adjustments of any kind. Operators were also tasked with retooling and fitting their machines for product changeovers which generally involved complete tear down and reassembly of said machinery.

Production Team Member/Assembly

Toyota Boshoku Illinois (ATS) - Lawrenceville, IL

August 2007 to July 2012

Assemble the seats with the parts delegated to my particular pitch. Was expected to do it in a quality minded but quick way as well to avoid sending the customer defective products.

Education

High School Diploma

North High School - Evansville, IN
2004 to 2006

Skills

Machine Operator - Manufacturing, Automotive/ Light Industrial Mechanics

Certifications/Licenses

Basic Electric and Gas Safety

Basic gas and electric safety training through Vectren.
