Profile

Computer system professional with 27 years technical experience. Strong Analytical background, experienced in technical support, Application Development as well as project management. Skilled in Database Administration Database design System Analysis, and Software development. Proven Significant contributions in the areas of Data Management, Software Development, and System support. Results-driven, self-motivated, strong work Ethic with the ability to adapt well and be effective in a variety of work Environments such as application development, project management, database Administration database design/development user and system support.

Technical Background

Languages

Visual Basic
Pl/Sql
Javascript
Vbscript
Html,XML
Asp,
Unix,Vb.Net
Sql, Unix Scripts
Java

O.S.

Red Hat Linux
Solaris 2.3
Sun OS
HP

Database

Oracle
Informix
DB2
Ms Access

Application Server

WebSphere
Oracle
JBoss

Boeing Oct 2008 – July 23 2018

Position: Data Architect

Project: FT-ISIS

Project Description: Design and Developed database schema's and application from development to production to support the following Boeing application Airplane Database, AIM, AWSM, FTDE, TPRN, FTME, MIDFORMS, TICS application using Toad and ER-Studio, Clear Case. Implemented using Oracle PL/SQL, Web Services. Used DB Links to interface and transfer data between external systems and local applications. Developed applications using tables, stored procedures, functions, triggers, views, synonyms, Materialized views, Packages XML transaction using Oracle 11gR2 database. Supported all phases of development, migration and deployment activities.

Position: Oracle Developer

Project: DWR

Project Description: Design and Developed DWR infrastructure environments from development to production. Implemented application and database clustering, for local failover. Implemented disaster recovery components for geographical failover. Design and supported data model. Migrated the application sever from Jboss to Oracle to WebSphere. Upgrade Oracle from 10g 11gR2. Developed Oracle objects in PL/SQL. Support all phase of development, migration and production deployments.

Chipton-Ross Sept 6 – Oct 2008

Client: Boeing

Position: Oracle/SQL Server Developer

Project: Test Integration

1). Project Description: Design, Implement new RAI (Repository of Authoritative Information) test environment using Apache, Oracle Http servers, PL/SQL Gateway modules in Oracle 8.1.7 - Oracle 10g. Configure dad components to connect to Oracle 8.1.7 - 10g databases. Installing and configure Oracle client and Oracle database 10g for the new RAI test environment. Test, Design, Develop, Oracle and SQL stored procedures using PL/SQL, HTML, DHTML, Oracle HTTP. Test, Design, Develop HTML web applications using HTML, JavaScript. Tools used Toad 8.6, SQL Enterprise Manager 8.0, SQL Analyzer 8.0, Unix HP-UX 11.0, Exceed, Oracle 8.1.7 - 10g, SQL 2003, Oracle Web toolkit, PL/SQL, Microsoft XP environment.

Meridian Technology May 22 – Aug 1

Client: Getty Images

Position: Oracle Developer

Project: TEAMS

Project Description: Design, Develop, Test, Oracle Packages, Stored Procedures, Functions. Converted TEAM database from 5.0 to 6.5, create, test, maintain Unix shell scripts. Working platform and tools used MKS, Oracle 8i, 9i , Toad, Java, in a Window XP, Sun Solaris environment.

Fujitsu April 25 2005 - Oct 1 2005

Client: Boeing

Position: Oracle Developer

Project: RMS (Revenue Management System)

Project Description: Design, Develop, Test Oracle Packages, Stored Procedures, Functions, Triggers, Tables. Maintain Configuration control from development - production. Performance tuning for SQL, Views, Procedures, Packages using Oracle 9i, Toad, Visual Source Safe, Windows, XP environment

Nordstrom April 28 2002 - April 22 2005

Position: Sr. Programmer Analyst

Project 1: Social Compliance

Project Description: Sr. Program Developer supporting all ASP.net application with SQL server backend. Analyze, Design of New System or System change in support of Social Compliance application. Develop, Debug, Code, Test Web Applications using ASP.Net, VB.Net, VBA, JavaScript, HTML, XML Develop, Debug, Code, Test Stored Procedures using SQL Server Stored Procedures Develop, Code, Build Business Social Compliance reports using Crystal Reports 9, Actuate reporting tools Walk through design with peer level It and business staff to validate solutions against business requirements Platform Microsoft Windows 2000 .Net Framework using ASP .Net, Visual Studio .Net, Crystal Reports 9 , Visual Source Safe, and SQL 2003, Actuate reporting tool.

Project 2: RDW (Retail Data Ware House)

Project Description: Sr. Program Developer Develop, Debug, Code, Oracle Stored Procedures, Packages, Functions, Triggers. Test Inline Pro C scripts for running SQL. Develop, Code, Unix scripts for extracting data from Oracle databases. Platform Microsoft Windows 2000, Unix, Oracle 9i using Actuate reporting tool and SQL Navigator for developing Oracle Objects..

Adecco, Nov 1999 - Dec 14 2001

Client: Boeing (Renton)

Position: Sr. Oracle Developer/Web Developer

Project: CEDD (Customer Engineering Digital Data)

Project Description: Oracle resource for the dept. Introduced new Oracle tools and techniques to develop Oracle objects such as Stored Procedures, Packages, Function, Tables. Developed all Oracle objects in PL/SQL such as Stored Procedures, Function, Packages, Tables, Index's. Using VB Script, JavaScript, HTML, ASP, Visual SourceSafe, Visual Interdef. Develop, Debug, Code, Test Oracle PL/SQL Packages, Stored Procedures, Triggers, and Functions. Extensive use of DBMS Utilities such as DBMS SQL. Walk through design with peer level It and business staff to validate solutions against business requirements Create Table Definition, Synonyms, Data base Links, Index's, Grant privileges Using SQL Navigator InterDev, Visual SourceSafe , IE and Netscape Browser technology in Oracle 7.34 Oracle 8.1..11.1, NT, Win 2000 environment, NT

Weyerhaeuser (TimberLand IS) March 1999 - Nov 1999

Client: Weyerhaeuser (TimberLand IS)

Position: Oracle Programmer (Resource Management System/Data Warehouse)

Project Description: Extract data from Legacy system porting to Client server using FTP, writing Unix scripts to validate completeness of file transfer, Writing stored procedures to validate data and populate Oracle tables. Develop, Debug, Code, Test Oracle PL/SQL Packages, Stored Procedures, Triggers, and Functions. Extensive use of DBMS Utilities such as DBMS SQL Create Table Definition, Synonyms, Data base Links, Index's, Grant privileges Using SQL Navigator , Oracle 7.3.4, 8.1 in NT/Windows 95 Environment. Crystal Reports

Solutions IQ, Nov 1996 - March 1999

Client: Regence Blue Shield

Position: VB Programmer /Oracle Developer

Project 1: Data WareHouse, (PIMS)

Project Description: Lead Oracle Developer for Data warehouse developed all Oracle Stored Procedures, Packages, Functions and Triggers. Design, Code Test Visual Basic. Develop, Debug, Code, Test Oracle PL/SQL Packages, Stored Procedures, Triggers, and Functions, Create Table Definition, Synonyms, Data base Links, Index's, Grant privileges Design, Code, Test Unix Scripts.

Project 2: (Data warehouse) Develop, Debug, Code, Test Oracle PL/SQL Packages, Stored Procedures, Triggers, and Functions. Create Table Definition, Synonyms, Data base Links, Index's, Grant privileges Design, Code, Test Unix Scripts.

Developed User Define Reports with Crystal Reports Using SQL Navigator , Oracle 7.3.4, 8.1 in NT/Windows 95 Environment. Using Crystal Reports

Kent School District Nov 1995 - Nov 1996

Position: Sr. Oracle Developer

Project: STARS

Project Description: Sr. Developer that developed Oracle Interface applications in Oracle Forms/Reports. Develop Oracle Stored Procedures, Packages, Triggers, and Functions. Analyzes and defines user problems in the Kent school district and maintain computer software. Develop, Debug, Code, Test Oracle PL/SQL Packages, Stored Procedures, Triggers, and Functions. Develop applications in PL/SQL using Oracle SqlForms, SqlReport, SqlPlus and Developer 2000. Create Table Definition, Synonyms, Data base Links, Index's, Grant privileges Facilitates project communications with management, developers and users for common understanding of projects results. Organizes and manages projects requirements, scope and schedule. Coordinates impact of state or federal requirements and shifts in district priority or resources, negotiates projects priorities, information requirements, resolve problems adjusts priorities and schedules as necessary. Coordinates projects with related programs and projects to ensure required integration and achievements of objectives.

Claircom Communications 1994 - 1995

Position: DBA

Project: Wireless

Project Description: Database Administrator supporting and developing all RDBMS system Support database administration and development for the business enterprise of Claircom Communication. Support of all RDBMS systems In a UNIX environment with host base applications Primary under Motif, X- Windows, Sun Operating System, Solaris 2.3.Planning, configuration, installation, tuning, and support maintenance of all RDBMS systems as the systems developed. Data base conversion between database products. Creation of database applications in Informix 4gl; develop Unix shell scripts, CRON Jobs Database troubleshooting, setup users and groups; security procedures, define schemes and storage Parameters. Database backup and restoration.

City Of Seattle 1992- 1994

Position: Network Administrator

Project: (DHHS)

Project Description: Network Administrator supporting the Local Area Network and all application connected to the LAN Served as Served as a PC/LAN Administrator for Housing

department oversee implementation of communication and PC-Base multi-user applications. Design business software application in Paradox. Converting all R-Base programs to Paradox. System Administrator for local area network (Polaris supporting 250 users. User support in Paradox 3.5, 4.0, Word 5.0, 6.0, Word for Windows 2.0, Lotus 3.1, Excel 4.0, 5.0, Win 3.1; Using Novell Netware 3.11. Installation of IBM PC, Terminals, and HP Laser Printers, NIC Cards, harddrives and other hardware devices. Research, evaluate and purchase data processing communication software and hardware.

City Of Seattle 1990 - 1992

Position: Data processing System Analyst

Project: (DCLU)

Project Description: Developed COBOL applications on the mainframe.

Design, Code, Test mainframe on-line construction software application in CICS, DB2, TSO, QMF, SPUFI, SDF, JCL. Design business software application in COBOL and Paradox User support in CICS, DB2, COBOL, PARADOX, Word 5.0, Word 5.5, Lotus 3.1, NOVELL NETWARE 3.11. Building Data Dictionary. Data Modeling. Installation of IBM PC, Terminals, and HP Laser Printers. Installation of NIC Cards. Hardware used IBM 3090 with MVS Operating System along with IBM ES-9000 with MVS Operating System.

Boeing 1988 - 1990

Position: Programmer

Project:

Project Description: Developed PL1 applications on the mainframe.

Developing PL/1 application for Integrated Data Management department.

Lead for development staff overseeing the Design, Code, Test Batch an on-line application using PL/1 IMS/DC, DB2, QMF, SPUFI, JCL, REXX, TSO, ISPF/PDF, SDF. Designing table structure.

Developing data dictionary. Hardware used IBM 3090 with MVS Operating System. QA Software Tester, 1987 - 1988 Microsoft Inc.

Testing of Microsoft software applications for the Quality Assurance Division.

Education and Technical Training

Kentucky State University B S Computer Science.
