mcglonefarms@yahoo.com

Energetic supervisor with 17 years of in depth knowledge of productivity strategies and ability to control expenses while delivering projects within budget is my goal. Currently seeking a MP&L Supervisor position where my expertise of working in a fast paced organization allows me the ability to enforce standards for completion of a quality operation, while bringing the ability to maintain a safe and healthy work environment for all employees.

EXPERIENCE

SEPTEMBER, 2014 – JANUARY, 2018

PRODUCTION SUPERVISOR, SIEMENS RAIL AUTOMATION

My daily responsibilities included the direct supervision of 40 employees, in 5 different departments. SAP was utilized for time keeping, inventory, vacation planning and customer demand of product. I was directly responsible for completing performance reviews for each of my 40 employees and they were completed quarterly.

Achievements include designing and developing a corrugated insert that housed electric coils. Resulting in the savings of \$18, 654.00 yearly for the company. Developed "Operation Backflush" to improve inventory control, product flow and on time delivery. This increased the companies yearly savings by 1.2 million dollars for two product lines. Standardize material flow through work centers to improve one time delivery. Reduced daily cycle count inaccuracies by 68% daily for a yearly savings of \$54,000.00

FEBRUARY, 2000 – AUGUST, 2012

MP&L SUPERVISOR AND PRODUCTION SUPERVISOR, FORD MOTOR CO

MP&L Supervisor Chicago Assembly- 2011/2012: Direct supervision 54 employees and the operation of 37 docks. My duties included inputting data into CMMS, TWOS and FPS system. I actively insured on time delivery, in a safe and efficient manner while fostering a cohesive working team in a union environment.

MP&L Supervisor Rawsonville Plant 2005/2011: Direct supervision of 32 employees and the operation of 11 docks. My duties included inputting data into SMMS, TWOS and FPS system. This required me to be indirect contact with production personnel to insure on-time delivery of sequencing and just in-time deliveries in a safe, efficient manner.

Achievements: Reorganization of parts warehouse to improve parts flow, line specific at a savings of \$4.2 million dollars yearly. Consisted of redirection of load/unload on the east dock improving inventory and parts flow guaranteeing on-time delivery to Carbon Can which caused a savings of 1.2 million dollars yearly.

Production Supervisor Rawsonville Plant 200/2005: Direct supervision of 47 employees in the making of wiper motors, on 5 production lines. Daily communication with MP&L to insure on-time delivery of required shipments to their designated docks.

Achievements: implemented the reclaiming of scrap through armatures, laminations and housings causing a savings of \$24,000.00 quarterly.
