

Carl Reiter

Wastewater supervisor

Savannah, GA
reitertripp@yahoo.com - 4042476777

I am a diligent and dedicated worker. I have training in nearly all aspects of customer service. My main focus is to excel in a career where I can feel like I am helping others while still feeling a sense of accomplishment by moving up in the company with the efforts I have put forth. I am an efficient learner; I excel in tasks that challenge my focus and ability to accomplish that goal in a timely manner. I will do what it takes to get the job done and I would appreciate the chance to show that to you and your company.

Willing to relocate to: Savannah, GA

WORK EXPERIENCE

Wastewater supervisor

Water Utility Management - Savannah, GA -

January 2018 to Present

Direct all wastewater personnel. File DMR's, complete NOI and permit transfer requests. Inform personnel of facility process adjustments. Making bench sheets and flow sheets, working through a cloud based CMMS to control workorders, preventative maintenance, and corrective maintenance schedules.

Superintendent

Cherokee County Water and Sewerage Authority - Woodstock, GA -

July 2015 to January 2018

Supervise plant and personnel. Maintain facility permit results by biological and chemical means to achieve EPD issued parameters. Conduct purchases, maintain budget and equipment. Input numbers and build reports for DMR's. Work closely with the public to establish a cohesive relationship with our neighboring community.

Operator

R.L. Sutton Water Reclamation Facility - Smyrna, GA -

May 2007 to July 2015

As a Class 1 Wastewater Operator my job responsibilities are to solve more complex diagnostic/ aspects of operational problems. I monitor various flows and chemical additives of Wastewater processes such as effluent flows, pH, oxygen, and chemical feed rates and supplies. I collect various samples and perform laboratory samples to ensure chemical additive parameters, pH levels, BOD parameters, nitrogen uptake, and other state and local regulations are within permit levels provided. I monitor process controls from SCADA to ensure proper equipment is within operational parameters and perform repairs if needed. I maintain logs and records regarding plant

operations for flow rates, analysis results, chemical volumes, and equipment maintenance. I also provide training to less experienced staff on equipment operation, rate and flow modifications and chemical/additive parameters.
