

## Functionality: Header

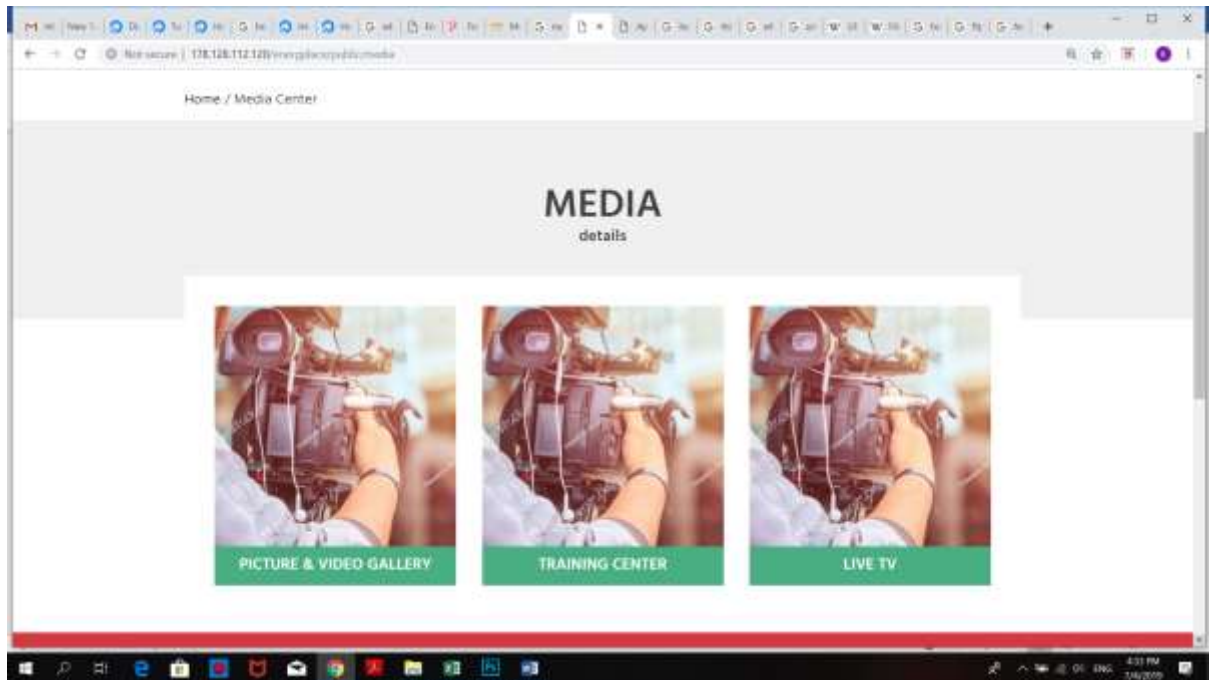

## Functionality: Footer

## **Functionality: Media Page**

Media Center-Picture & Video Gallery cannot open

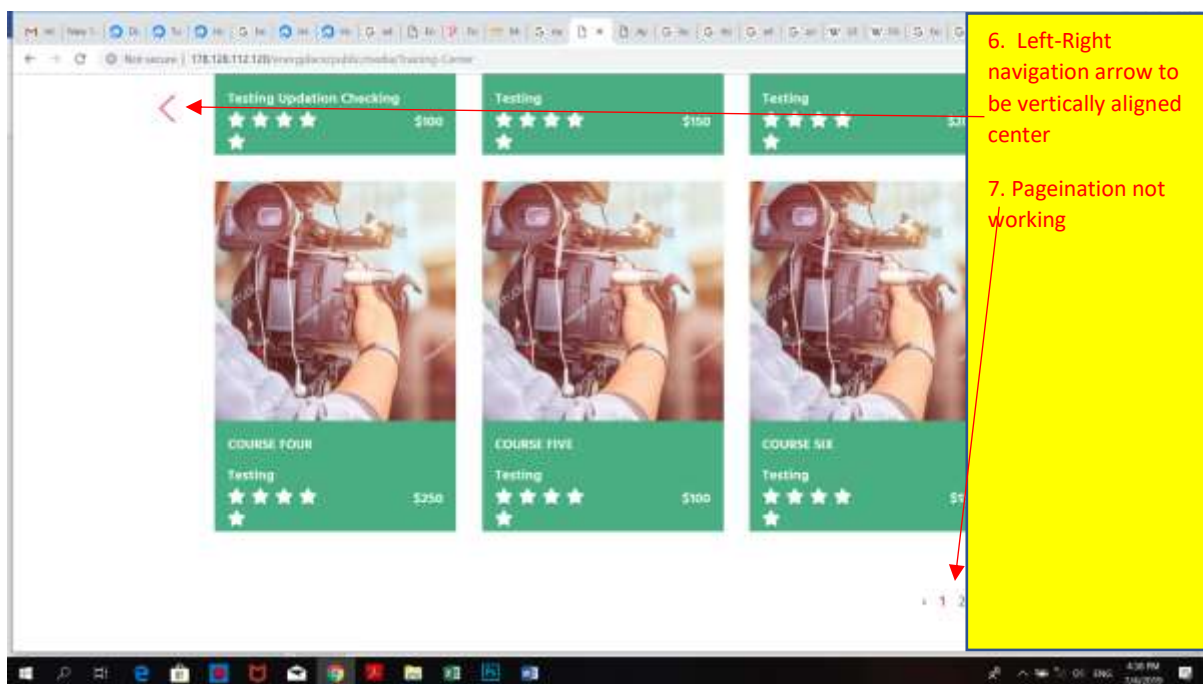

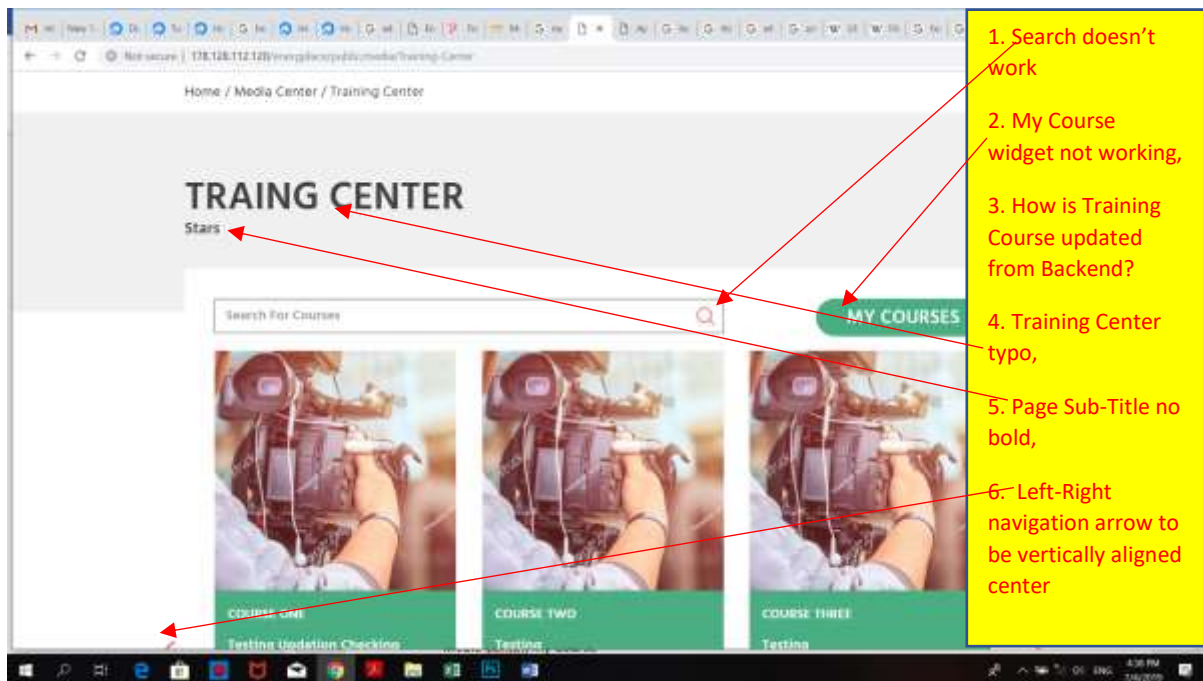

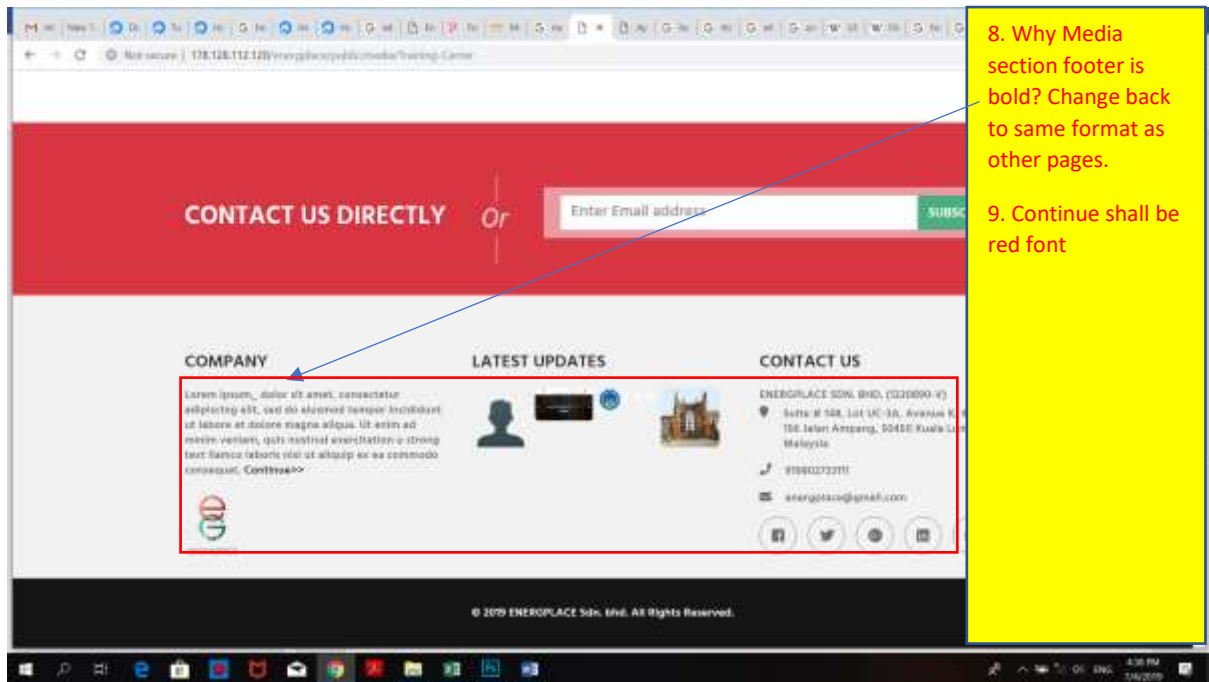

The screenshot shows a web browser with a 500 Internal Server Error. The error message is "ErrorException (E\_NOTICE) Undefined variable: user\_id". The browser's developer tools are open, showing the error details and the corresponding PHP code snippet. The code is a REST API endpoint for getting data, and it appears to be missing a variable assignment for 'user\_id' before it is used in a database query.

Environment & details:

GET Data

## Media Center/Training Center

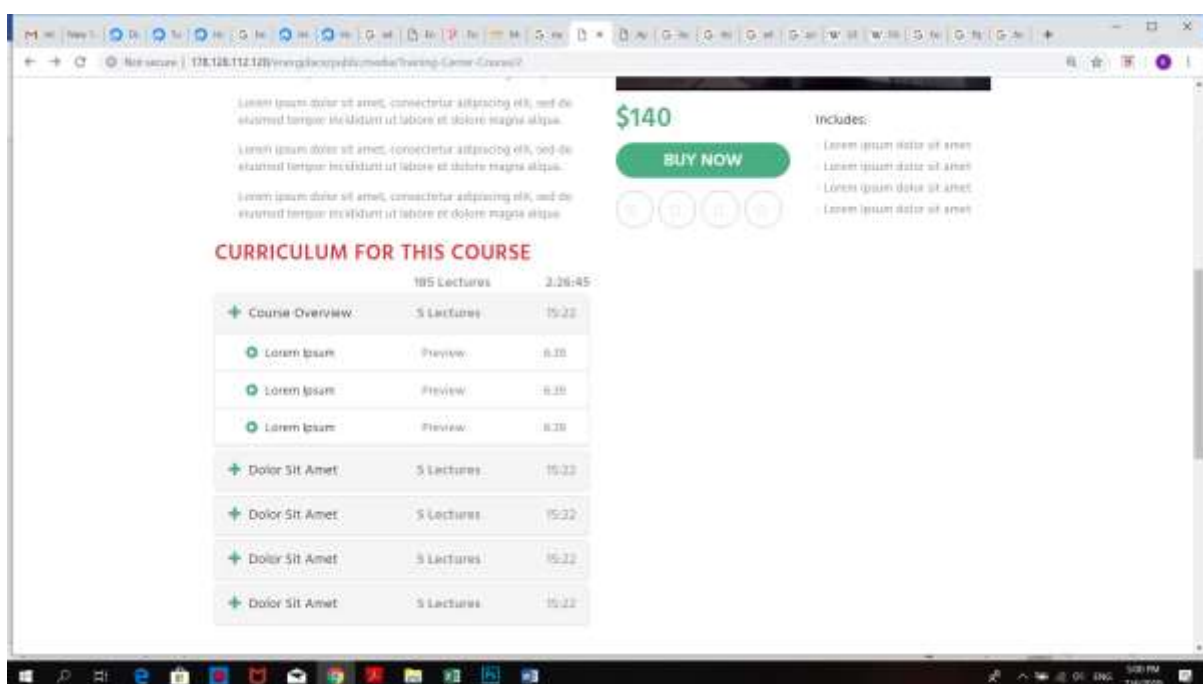

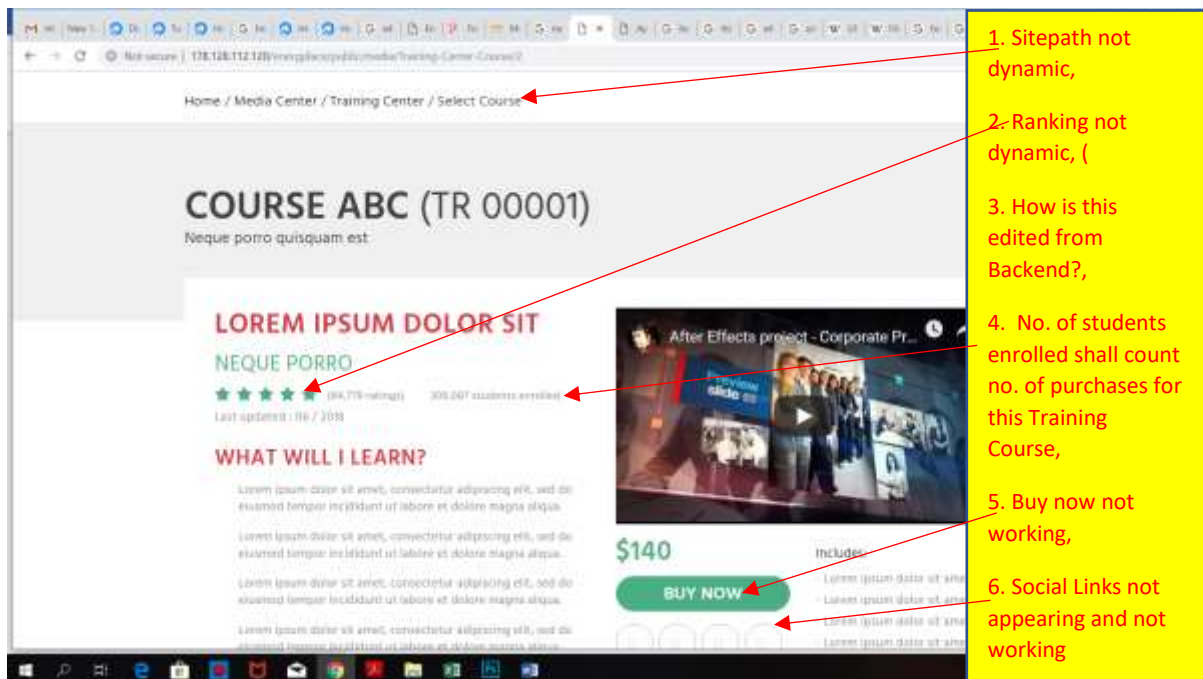

8. Why Media section footer is bold? Change back to same format as other pages.

9. Continue shall be red font
