8/14 – 11/18 Maintenance Mechanic
Cummins/RMEP
Maintaining automated machinery that produce engine blocks that are the foundation of a superior diesel engine.

10/11 - 8/14 Maintenance Technician
Rexam Healthcare Products
Performing maintenance duties on small and large injection and blow mold machines that extrude plastics to produce bottles of all shapes and sizes. Also conducting preventive maintenance on all machines operated. Use computers and programs to file and complete scheduled work-orders in a timely manner. Ordering parts to be used on down equipment also, receiving parts and installing them properly on any given machine. When breakdowns occur, I troubleshoot properly to find the "root-cause" of problem. Maintain conveyors and associated systems. Operate forklifts when needed.

1/07 - 8 /11 Maintenance Technician II
Berry Plastics
Conducting preventative and corrective electrical and mechanical maintenance on most all equipment that's operated on site using the appropriate tool needed to complete tasks in a high paced environment. Some blueprint reading and Allen Bradley experience. Maintenance tasks include, inspecting, repairing, or changing out; belts, gears, photo-eyes, pumps, shafts, cams and other mechanical moving parts and components.
•Ammeters, voltmeters, ohmmeters, and other test equipment

2/01 - 1/07 B Maintenance Technician
Sara Lee Bakeries
Duties included but not limited to handling most maintenance tasks such as; performing preventive maintenance and fixing breakdowns on most all equipment that was operated on site.Used blueprints and schematics to locate and troubleshoot electrical and mechanical problems that may have occurred, while also using a wide range of mechanical and electrical tools to perform these tasks.
